DNA Type Case No.

APPLICATION FOR DNA COAT COLOR TEST(S)

DNA Color Test Fee: \$25/ea.

Use this form to have a horse's coat color determined through DNA.

Coat color tests may be ordered either at the time of registration or later, using the same hair sample used for parentage verification which is on file with the Veterinary Genetics Lab. Only the current owner may order a color test(s) for a specific horse. ASHA will provide the result to the owner, and it will be recorded in the ASHA registry database in the horse's description. If the owner wishes to have the registration certificate reprinted to include the color test results, the original certificate must be sent to the ASHA office and additional fees apply. If done in conjunction with a registration or transfer, no additional fees apply.

Each color test involves looking for a specific genetic marker, so each test has a separate cost. The exception is the red/black test and the bay-restriction (agouti) test – when these two are ordered together there is a discount. For complete descriptions of these color tests, see www.vgl.ucdavis.edu/services/coatcolorhorse.php

Please send completed form and payment in U.S. funds to the office address provided above. **DNA coat color applications received incomplete, including fees, will be subject to delays in processing, or may be returned without processing. ALL FEES ARE NON-REFUNDABLE AND NON-TRANSFERRABLE.**

Name of Horse _____

Registration Number _____

Owner(s) Name(s) _____

Address _____

City _____ State _____ Zip _____
